

9th Lymph Clinic Day Wolfsberg

The conservative therapy of
lymphoedema: What is certain and
what new approaches are there?

19th – 20th April 2024 · Wolfsberg, Austria

Final Programme

The conservative therapy for lymphoedema: What is certain and what new approaches are there?

Dear Sir or Madam,
Dear Colleague,

Insurance providers require that we all make changes to our structures and processes in order to integrate the participation goals defined by our patients into the individual and patient-oriented therapy and rehabilitation measures. This should be considered the benchmark for setting goals.

At this conference, we want to discuss the treatment options and measures for conservative therapy of lymphoedema and also show their limitations and how they can potentially be combined with surgical measures. What are the tried-and-tested concepts and therapies, what new approaches are available in medicine and research and how can these pool forces with our patients' participation goals?

In light of this, we would like to explore complex manual decongestive therapy with manual lymphatic drainage, bandaging options and alternatives such as ACWs, patient-oriented and individual compression, but also combinations with IPC, taping, exercise therapy and much more. We would also like to pay special attention to infantile lymphoedema.

Implementation of all measures necessary to achieve rehabilitation goals requires interdisciplinary cooperation between the different professional groups. We will be discussing this at our 9th Lymph Clinic Day in Wolfsberg.

We cordially invite you to join us!

Kind regards,
Prim. Dr. med. Christian Ure
Conference Chair
